

MATCHING GREEN SKILLS SUPPLY WITH GREEN LABOUR MARKET NEEDS

Started in December in 2014, the Greens Match project is a 2-year initiative aimed at reducing the gap between green education and training offer and green employment by cooperating, innovating and by pooling good practices.

The project is targeted to policy SMEs, and in particular companies from 4 sectors:

- ✓ Recycling & waste management
- ✓ Transportation & logistics
- ✓ Vehicle manufacturing
- ✓ Agro and food industry

The project is also targeted to VET providers, business associations, public employment services and policy makers.

Identification of measures for the development of the green economy

Identification of labour needs of the current green market in selected companies

Identification of 15 green occupations and their respective competency profiles in the selected sectors

Identification and arrangement of training resources

Identification of best practices focused on reducing the gaps between existing skills and needs of the labour market

Creation of 15 roadmaps to meet the needs of employment and training on the identified occupations

Carrying out a final publication
